is and I have or that my attal it is of my most Cas providance an me for I do not know Gentleman & to Charen 1 season arrives Miragle of wi but thust thy willbe ful relation age with inthefo, aroted car lamas . Hacata V.

slowys frish the country places even on Sunday this makes fore tremble list the crafty oneny should take this apparting of waing aireas, and all I can as for their is to beach got in their tehict and beside this there are other things. But in the other hand your as hepty at times almost as any soul con wish, I would not the five up very rear People for an Emperois Crown I trust my dear Fathers you will take my sheatist into consideration, and send me help which maybe Lac by Jamany mut it by no means to exceed thether as I what the Raingouile he surty next year from their line of late and formable in their is no so with the they will be more favorable in represent to this delp will be more you can also mothery can or will he ame Lie effectivally with only I Missionaries. May Reasons are trist, this station is not I am purmated any other we haves. A man cannot as here what. can so in the boost Indies. The Church Missions here, have each their seperate station. This Country, not somed by motion for timerating four it a la Dank a hille or hill & half in almost momentary expectation of Rain, which it is file would without with produce fewer and it we stay at himme falls from Regle are disappointed, again, if one falls such the think is sain to being the other days how I missionaire might let filmend unefully and the pents of lank 2 Right stay in Third they would have to places and fout as much work as they could possibly do. The other might be blaced at long is the Case as they are so far from us. He might the keep School the Bay of our there he remained to Contryvers Sort there ston his of houses, where he aight, occasionally march. this one could regularly change once in 3 or 6 Months with those in Theory other if one thould be tastens sick; two could kuch forward that part of the work which should be julged of myst consequence. I trust may dear Father will not think I don dietating what they shall dos. I only submit it for your consideration. I can afrage son it is not only my opinion, but that of other

A Missimony bile his much to the to discourage who me well acquainted with the subjects and with whom him; lathering principally among a people who are so I have consulted. The generally way has with the Mission was in the Borrantains is to call their Joseph together mentally the higher than girllet to instability, and I now at day beat every houring, and I think it is I allow ful puriodely by one hable to instability, and I now at day beat every houring, and I think it is I welly the test ful puriodely on this head. My colleague dead, myself exercising for reading and they exist is I much that we can like and they weather so raining, that our friends committee the test their from wandering, but this we can like and they would be somether to be such that the soul to the soul with me continued to the soul to the A have consulted. The general way have with the historians with the thoronome of any heart way howing, and their Prople to the covering for heart ing and thought it is south the the third that the many for the test the many form will no doubt feel. the lofs of my Collingine, but your lop is smad when compared to that of the Church Missionary society who house already lost & besides the Cha plain of the Cloud who die since my last to you and I think Mit. lune the present Chaptain toto me they had lost alinson this station since its intalles homent - I am hafifug to my the present harmony exists between myself to the Church himminaries. In reference to pasons who many he afe-Robit of Both Clarant of a Costine habit will by no memore to the Chamate. My poor achanto Collegue suffered which from this insorment that a few days befoll he was taking some kind of Miching or other way day. My Sugar tells me that he is cutain he to Para of the habit this is also a had thing in Dodo for hat gilling that fittely to that wothing bids for hat gilling bet of they for he best a hoken Phlymetic habit are not fit for this Climate then ful open dealons persons best suit here, in the respect my Colleague was adminably suitable. Brown who have been used to thete and Color will there lains the any who have been used to the want be lean get strong they would duit better than a full habit. In reference to the clothing some attentions would be much for the better, some pood they those, the bottoms made as fight as possible a Pair of that Boots laced at the top under the Postatoons with very thick story total soler of Laure ben differ to buy a pair here & I know not what I could do without them, the they are but their in the bottoms. I could be glad it I had a pair of show for big enough to mean outsite another hair, nothing is botter in this country thouse thou, It would be very , well also for all thints to be lotton, the Lines ones in the day Season are like ice when wet, which meter as change often and this is weaking. Some topolen trokings are indispensably necessary here

lary Misson , and one her we cans

The Plan of mentioned in a former little Total look at as one which promises much jood. It would cost something
